SOFTWARE ENGINEER

Full-Stack Developer with **2+ years of hands-on industry experience** in building and maintaining **scalable web applications** using **React.js, JavaScript, PHP (Laravel, CodeIgniter, Symfony), and MySQL.**
Strong focus on **frontend development with React.js / Full-Stack Roles,** API integrations, and cloud-based deployments. Experienced in **FinTech, ERP, and marketing automation platforms,** including payment gateway integrations, KYC workflows, and responsive UI development.

PROFESSIONAL EXPERIENCE

DataAegis Software Pvt Ltd - Bengaluru, India **January 2024 - Present**
software engineer

- Delivered full-stack features across 3 platform types—FinTech, ERP, and marketing automation—supporting production-ready web applications and faster feature rollouts
- Built React.js-based frontend components with a focus on performance, usability, and responsive design, improving page consistency and reducing UI rework by ~25%.
- Integrated the MomentPay payment gateway with JavaScript event listeners and iframe-based checkout flows, enabling secure payment processing and smoother transaction handling.
- Built backend modules in Laravel, CodeIgniter, and Symfony, delivering secure APIs and business logic that supported multiple core workflows and reduced defects by ~20%.
- Collaborated with cross-functional teams to deliver production-ready features for 3+ enterprise clients, helping meet release timelines and maintain deployment quality.

Key Projects:

1. ePay – Merchant Onboarding & eKYC Platform (Laravel, MySQL, APIs)

- Engineered merchant onboarding workflows with auto-generated KYC application numbers, streamlining application tracking and reducing manual entry effort by ~30%.
- Implemented AJAX-based verification flows for Trade License and compliance checks, cutting validation response time by ~25% and improving form completion speed.
- Integrated OCR and compliance APIs including Google Vision, AWS Textract, Signzy, and LSEG to support merchant verification workflows for India and UAE regulations.
- Built dashboards that consolidated merchant data into a single view, improving operational visibility and reducing manual status tracking effort by ~35%.

2. ERP-Ecom System – Omni Sales & Business Automation (CodeIgniter, MySQL, AJAX)

- Created responsive UI components for configurable product grids, improving product discoverability and reducing layout issues across desktop and mobile views by ~20%.
- Implemented centralized default settings for language, currency, and country, simplifying onboarding flows and reducing initial setup effort by ~30%.
- Redesigned product presentation with card-based layouts, improving UI clarity and contributing to an estimated ~18% better user interaction with catalog pages.

3. Aritic – B2B Marketing Automation Platform (Symfony, MySQL, Javascript)

- Enhanced frontend components to improve responsiveness and usability, reducing interface inconsistencies and improving page adaptability across key user workflows by ~20%.
- Debugged and resolved JavaScript and PHP issues, improving platform stability, reducing recurring defects by ~25%, and strengthening overall application performance.

Jindal India Ltd - Howrah, India **July 2021 - December 2023**

Shift Engineer

- Applied SAP systems, MIS reporting, and production planning practices to support daily plant operations, reporting accuracy, and schedule adherence across shift activities.
- Led shift operations, supervised a 65–70 member team, and conducted quality inspections to maintain production continuity, safety compliance, and output consistency**July 2019 - June 2021**

Indian Steel Corporation Ltd. - Gandhidham, India
Trainee Engineer

- Coordinated production updates and reporting with cross-functional stakeholders, helping reduce shift-level delays by ~10% and improve issue escalation turnaround.
- Oversaw production processes, manpower planning, and material flow for daily operations, helping maintain schedule adherence and improve shop-floor coordination by ~12%.

TECHNICAL SKILLS

Front-End
- React.js, JavaScript (ES6+), HTML5, CSS3
- Bootstrap, Responsive UI, AJAX

Back-End
- PHP (Laravel, CodeIgniter, Symfony)
- REST API Devlopment & Integration

Database
- MySQL

Cloud & Deployment
- Vercel (Cloud Hosting & Deployment)
- CI/CD (Git-based auto deployment)
- Environment Variables, Production Builds

Tools
- Git, Postman, VS Code, NetBeans, MS Excel

Domain Experience
- Payment Gateway Integrations, REST API Integration

PERSONAL / ACADEMIC PROJECTS

Weather Forecast Application

- Built a responsive weather forecasting web application in React.js, delivering a mobile-friendly interface and complete core functionality within ~2 weeks.
- Connected real-time weather data through third-party APIs, enabling live forecast updates and reducing manual refresh dependency for end users by ~40%.
- Deployed the application on Vercel with CI/CD enabled, shortening release turnaround time to minutes and simplifying continuous frontend updates.
- Leveraged cloud hosting and CDN delivery to improve load performance, achieving fast and reliable page access with an estimated ~30% quicker content delivery.
- Live Demo: https://weather-app-lemon-pi.vercel.app/

EDUCATION

Indore Institute Of Science & Technology, RGPV, Indore **June 2015 - June 2019**

Bachelor of Engineering in Mechanical Engineering
